

## Technologist – Protein

**This innovative dairy manufacturing business is growing from strength to strength, come be a part of their R&D journey.**

- **Opportunity to make your mark as a protein ingredients specialist**
- **No two days will be the same - opportunity to manage multiple projects**
- **Innovative and fast moving organisation**

### **The Opportunity**

This is a fantastic opportunity for a specialist in the dairy food technology industry specifically across Protein ingredients to really make their mark on a team that is growing rapidly. This role is unique in the sense that it has touch points across the entire lifecycle of the product throughout the business from customers, sales, manufacturing, quality and purchasing. Great role to diversify your skillset.

### **The role**

As the Product Technologist in the proteins space you will be the subject matter expert in Lactoferrin (Lf) and all other related protein products. You will provide expertise and support to the whole business to help us better understand this product and how it can be utilized effectively across product specifications and other protein-based products.

You will also identify and deliver any product improvement projects for customer and consumer benefits as well as sustainable competitive advantage. You will lead the delivery of technical support and short-term projects for sales and manufacturing, this will include trials and specific customer product requirements. A diverse role really making an impact.

### **Skills / Experience required**

Your willingness to get stuck in and innovative thinking around technology development coupled with your passion for lactoferrin and proteins will set you up for success. Alongside these attributes it is also important that you have the following;

- Minimum of Dairy or Food Science, Food Technology degree
- Minimum of 3-5 years working as a Technologist in Dairy Food Products
- Technical and Product development expertise across Lactoferrin and other dairy Ingredients
- Proven track record working on successful NPD projects
- Excellent Communication skills
